### EARNINGS

### consolidated

3Q21 3Q20 AntarChile posted net income of US\$440 million in 3Q21, a US\$383 million increase year-over-year (YoY).

That change was due to an operating income increase of US\$514 million, mainly explained by Arauco (+US\$378 million) due to pulp and wood products revenues increasing 51.1% and 35.0%, respectively. Copec also had higher operating income (+US\$127 million), on account of greater margins from a higher revaluation of inventories and increased sales volumes in Chile and Colombia. Sonacol also reported an operating income increase (+US\$10 million) from an increase in the volumes pipelined.

Non-operating income rose US\$382 million, related to Arauco (+US\$244 million), particularly due to the sale of forest lands. There was also higher non-operating income at Abastible (+US\$103 million), from the sale of its shareholding in Gasmar, and at Empresas Copec (+US\$25 million), explained by an increase in income in associates and joint ventures, mainly due to Cumbres Andinas (Mina Justa).

There was higher tax expenditure of US\$253 million from the net income increase in the quarter.

3Q21 2Q21 AntarChile had a net income increase of US\$213 million quarter-over-quarter (QoQ). That is explained by greater non-operating income of US\$375 million, mainly due to Arauco (+US\$253 million) from the sale of forest lands. Abastible also posted a non-operating income increase (+US\$106 million) from higher other earnings related to the sale of its shareholding in Gasmar, as did Empresas Copec (+US\$22 million), explained by an increase in income in associates and joint ventures, mainly due to Cumbres Andinas.

Operating income increased US\$92 million, largely due to Arauco (+US\$103 million) from pulp and panel sales volume increase, and panel and sawn timber sale price increase. That was partly offset by the drop in operating income of Abastible (-US\$8 million) on account of lower gross profit.

There was greater tax expenditure of US\$101 million, due to the higher net income in the quarter.

20212020

Year-to-date (YTD), net income was US\$805 million, increasing US\$755 million on that YTD 2020. That is explained by operating income increasing US\$1,307 million, mainly due to Arauco (+US\$885 million) related to higher pulp and wood product revenues. Copec also reported higher operating income (+US\$396 million), on account of greater sales volumes and margins and related to a positive revaluation of inventories.

YTD

Non-operating income rose US\$491 million, largely associated with Arauco (+US\$323 million), explained by the sale of forest lands, lower financial costs, along with higher income in associates, mainly due to Sonae. There was also a non-operating income increase at Abastible (+US\$100 million) from the sale of Gasmar, and at Empresas Copec (+US\$42 million), because of the higher income in associates and joint ventures, mainly due to Cumbres Andinas.

There was higher tax expenditure of US\$509 million.

AntarChile's total consolidated assets increased 3.2% in 3Q21 on those at December 31, 2020.

Current assets rose 13.0%, driven by higher trade receivables at Arauco and Copec, and a cash increase at Arauco, Copec and Abastible. That was partly offset by a decrease in current tax assets, mainly at Arauco, Copec and Abastible, and lower available-for-sale assets due to the sale of Gasmar by Abastible.

Non-current assets dipped 0.3%, explained by a drop in the biological assets of Arauco from the sale of forest assets and lower intangible assets other than goodwill of Copec related to the depreciation of the Chilean peso. That was partly offset by an increase in property, plant and equipment, mainly due to the Arauco mill modernization and expansion (MAPA, according to the Spanish acronym) project.

On the other hand, current liabilities rose 28.7%, on account of higher non-financial liabilities from the greater dividend provision. There was also an increase in the accounts payable of Arauco and Copec, and higher current tax at Copec, Arauco and Abastible.

Non-current liabilities dropped 3.8%, mainly because of lower other financial liabilities at Arauco, Copec and Empresas Copec, which was partly offset by Abastible.

Lastly, total shareholders' equity increased 3.6% on that as of December 2020, because of higher retained earnings, which was partly offset by lower other reserves.

The company's cash flow before the exchange rate effect was +US\$390 million in 3Q21, which was an increase on the negative cash flow of US\$11 million YoY.

The operating cash flow as of September 2021 increased US\$767 million YoY, mainly explained by higher sales charges at Arauco, Copec and Abastible due to greater sales volumes and other operating payments of Arauco. That was partly offset by greater payments to suppliers at Copec, Abastible and Arauco.

The investing cash flow in 3Q21 was US\$416 million less negative YoY. The main reason was the sale of Forestal Los Lagos in the first quarter of 2021 and the sale of Gasmar in the third quarter of 2021. There were also lower cash outlays to purchase property, plant and equipment at Arauco.

The financing cash flow dropped US\$782 million YoY, mainly explained by lower proceeds from loans at Empresas Copec, Arauco and Copec, and greater loan repayments at Arauco and Copec.

#### SALES AND ADMINISTRATIVE EXPENSES

The administrative expenses of AntarChile (individual) in Chilean pesos in 3Q21 increased on those YoY, largely due to higher board fees, related to the death of Mr. José Tomás Guzmán Dumas in January 2020, who was replaced in May 2020.

### NET DEBT

#### **DIVIDENDS**

US\$ million

AntarChile seeks to maintain a relatively constant level of financial liabilities over time but with a downward trend.

Cash and cash equivalents are fully related to the dividends received by Empresas Copec and Colbún and those paid by AntarChile.

AntarChile's dividend policy is linked to that of Empresas Copec, which prevents an unnecessary build-up of cash at the holding company.

In October 2021, it was agreed to modify the dividend policy of AntarChile by increasing the percentage of net profits in the year to be distributed as a dividend from 30% to 40%. This was since Empresas Copec modified its dividend policy in the same way.

Both Empresas Copec and AntarChile pay a final dividend in May, so cash and cash equivalents normally drop in the second quarter. Besides this, in December 2018, May 2019, December 2019, May 2020, December 2020 and May 2021 the company received a dividend payment from Colbún.

Arauco posted earnings of US\$511 million in 3Q21, US\$475 million up YoY. That is explained by a US\$378 million increase in operating income, related to pulp revenues surging 51.1% from a sales price increase of 66.3%. Wood products 20 revenues rose 35%, associated with panel sales price and volume increases and higher sales price of sawn timber. That was partly offset by a 2.3% decrease in the pulp volume and unit sales costs increasing 8.4% for bleached softwood and 2.6% for unbleached softwood.

Non-operating income rose US\$244 million, mainly due to higher other revenues from the sale of forest lands (+US\$237 million), greater income in associates and lower financial costs.

There was higher tax expenditure of US\$148 million.

Net income in 3Q21 was US\$310 million up QoQ. That was because of a US\$103 million increase in operating income due to pulp and panel sales volumes increasing 5.5% and 2.3%, respectively. Panel and sawn timber sales prices also increased 10.8% and 14.9%, respectively. Unit production costs dropped 4.8% for bleached softwood and 0.7% for unbleached softwood. That was partly offset by a 1.6% increase in bleached hardwood costs.

Non-operating income increased US\$253 million on account of higher other revenues from the sale of forest lands. There was also higher income in associates, favorable exchange rate differences and lower financial costs.

2021

**YTD** 

Net income YTD 2021 was US\$814 million, which is a US\$863 million increase on that YTD 2020. That was mainly due to operating income increasing US\$885 million, explained by higher pulp revenues from a 51.8% price increase, and greater 2020 wood products revenues, associated with sawn timber and panel sales price and volume increases. That was partly offset by a 4.6% decrease in the pulp sales volume and unit sales cost increases of 8.2% for bleached softwood and 1.3% for unbleached softwood.

Non-operating income rose US\$323 million due to higher other revenues from the sale of forest lands, lower financial costs, and higher income in associates, mainly at Sonae. That was partly offset by lower financial income.

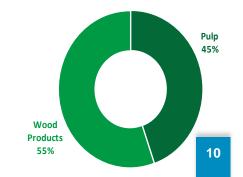

Tax expenditure increased US\$343 million, on account of higher net income and the effect of the higher tax rate in Argentina on deferred tax.

#### **PULP**

Pulp demand remained stable in the third quarter of 2021 with price decreases in certain markets late in the quarter.

Sales were affected by logistical issues, which are hitting all industries globally, mainly in Asia. This has led to a drop in exports, mainly in the domestic market. Inventories increased 8 days for hardwood and 6 days for softwood.

Pulp demand dropped in China in the quarter. That was due to government restrictions on power consumption in various provinces, which caused stoppages and reductions of plant operations in different industries.

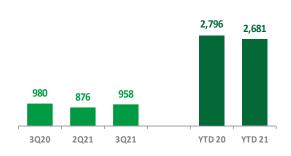

The tissue industry improved, with some producers making price increases. The printing and writing paper industry has remained stable, with producers trying to raise product prices.

The softwood price was stable throughout the quarter but the hardwood price dropped. The price spread increased to US\$205 by late September 2021.

There was large pulp demand in Europe with stable high prices. That has generated a high price difference with China. The tissue industry started out weakly but recovered in the at-home and away-from-home segments. The printing and writing paper industry had higher demand and a price increase. Late in the quarter, some producers in the paper industry were hit by high prices of power and chemicals.

#### **PANELS**

There was continued high demand and prices for panels in the Latin American market. That is due to a shortage of products, logistical issues for imports and the cost increase of important raw materials. This trend is forecasted to continue in the next few months.

#### **SAWN TIMBER**

The upward plywood sales trend continued in the third quarter, mainly explained by greater demand in markets in Europe, Oceania and Chile, and the logistical headaches of some competitors due to the pandemic. Prices in the United States remained stable in the quarter, and for the rest of the markets prices could carry on increasing up to the end of the year due to strong demand and low stocks.

Demand for sawn timber remained high early in the quarter, leading to a price increase. The logistical supply was tough in the quarter (higher costs and low availability). Due to the real estate and energy crisis, by the middle of the quarter there was a drop in demand from the Asian market, mainly China. Furthermore, Vietnam was hit by COVID-19 and plant closures. The remaining markets continue stable.

Regarding the remanufactured product market, the good results in the United States continued, driven by the retail sector that has remained strong and the recovery of the house construction, repair and refurbishment sectors. On the other hand, there is still a supply shortage, due to the application of tariffs and logistical issues because of the pandemic. This has enabled Arauco to gain a higher market share.

3Q21 3Q20 Copec posted earnings of Ch\$68,904 million in 3Q21, Ch\$55,099 million up YoY. That was due to an operating income increase of Ch\$100,381 million, mainly because of increased margins from a greater revaluation of inventories, and higher sales volumes in Chile and Colombia. At Copec Chile, sales volumes increased 38.8% in the dealer channel and 98.8% in the industrial channel. Terpel's liquid fuel sales volumes rose 39.6%. MAPCO had a drop in EBITDA from lower unit fuel sales margins and higher expenses, which was partly offset by sales volumes increasing 1.3%.

Non-operating income climbed Ch\$9,763 million, due to greater other revenues, higher income in associates, favorable exchange rate differences and lower financial costs. That was partly offset by a drop in other earnings.

There was higher tax expenditure of Ch\$55,045 million, mainly on account of the tax reform in Colombia with the tax rate increasing from 31% to 35%.

3Q21 2Q21 Net income in the quarter was Ch\$6,007 million down QoQ. That is explained by higher tax expenses of Ch\$16,037 million, mainly due to the tax reform in Colombia.

Operating income increased Ch\$6,371 million, due to a higher gross profit from sales volume increase and lower distribution costs. Sales volumes increased 21.1% at Copec Chile, 16.8% at Terpel and 1.1% at MAPCO.

Non-operating income rose Ch\$3,659 million, related to higher other revenues, greater financial income, an increase in indexation income and favorable exchange rate differences. That was partly offset by higher financial costs and other expenses.

20212020

Copec's net income YTD increased Ch\$180,312 million compared to that YTD 2020.

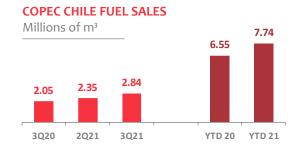

2020

Operating income climbed Ch\$281,724 million, due to sales volumes increasing 18.1% at Copec Chile, and liquid fuel sales increases of 29.3% at Terpel and 4.3% at MAPCO. That was due to the greater mobility and more dynamic economy. There were also higher sales margins related to a positive revaluation of inventories in Chile and at Terpel. That was partly offset by the lower fuel distribution unit margins of MAPCO.

YTD

Non-operating income rose Ch\$27,005 million, on account of lower financial costs, favorable exchange rate differences and higher income in associates, explained by Copec Aviation.

Tax expenditure increased Ch\$128,417 million.
