CORPORATE
PRESENTATION

May 2018

BACKGROUND review

AntarChile was organized in 1989, to be a holding company of the Angelini Group, who controls the company by owning 74.7% of its share capital. Its main investment is the shareholding interest of 60.82% of Empresas Copec, which grants AntarChile control thereof and represents approximately 97.6% of its consolidated assets. Empresas Copec is counted among the most important and of highest market capitalization companies in Chile.

As of December 2017, AntarChile's asset portfolio amounts to US\$ 22 billion.

AntarChile's investment policy is implemented through Empresas Copec, comprising a variety of business areas where the main investments segments are forestry and fuel distribution.

Empresas Copec has evolved from an export company to a multinational firm

2006

TOTAL ASSETS 10,239 million
TOTAL SALES US\$ 8,257 million
SALES ORIGINATED IN FOREIGN SUBSIDIARIES 13%

2017

TOTAL ASSETS US\$22,728 million
TOTAL SALES US\$ 20,353 million
SALES ORIGINATED IN FOREIGN SUBSIDIARIES 47%

The average of AntarChile's Ebitda of the last 7 years is around US\$ 1,800 million

MM US\$

As of 2017, Ebitda of the companies acquired after 2010 represents 25% of AntarChile's total Ebitda

As of 2017, the Ebitda of the companies that existed before 2010 has decreased approximately by 22%. This is explained, fundamentally, by a reduction in the Ebitda of the forestry sector due a drop in pulp prices. Between 2010 and 2017 pulp prices fell off around US\$ 150 per ton.

Arauco is one of the main players in all of the markets in which it participates

COMPETITIVE ADVANTAGES

Largest owner of forestry land in the southern cone (1 m hectares).

Location of forests allows fast growth rate and short harvest cycle.

Logistic competitiveness due to short distance from forest - mills – ports.

Product offering allows value maximization of forest base: Pulp, panels, timber, energy.

Arauco currently sells its products in over 80 countries, in 5 continents

- > **Arauco produces** pulp, panels, and sawn and processed timber, among other products; it owns and operates industrial plants in Chile, Argentina, Brazil, Uruguay, the U.S.A. and Canada.
- > **In the pulp market**, Arauco has low cash costs due its pulp mills located in Chile, Uruguay and Argentina.
- > **Total sales** have grown with a CAGR of 13% from 2000 to 2017.

WORLD PULP SUPPLY CURVE

SALES 2017 by line of product

Capacity 2017 by grade

HISTORICAL SALES US\$ million

Since October 2016, pulp prices have increased around 40% in NBSK and 46% in BHKP. In the midterm, prices are expected to remain stable

Supply

- Global capacity will increase in 2.3Mt in 2018 (+1.1 BSKP and +1.2 BHKP), mainly to Tres lagoas II, OKI and Metsa Fibre Anekoski
- Consolidation of the industry
- There are no major investments confirmed in 2019 and beyond

Demand

- Tissue consumption in China is expected to grow
- China's recycled paper ban will increase the demand of virgin fiber
- Low availability of Hardwood Chips in Asia will reduce pulp production in Japan and China, increasing the demand in these markets
- Low levels of inventories (paper and pulp producers)

Arauco has 4 future projects

Grayling

Valdivia

MAPA

Masisa Mexico

Highlights

It is located near to the US's mid-west demand of wood products, while other mills are close to the coast. Michigan is a zone with an important offer of forestry supply. It is expected that melamine products will represent 30% of total production.

The project will transform the Valdivia mill into a dissolving pulp mill. This kind of pulp competes with cotton, and it has a premium up to US\$ 400/ton over hardwood. The production of dissolving pulp will not affect the current production levels of the mill.

Modernization and enlargement of the Arauco pulp mill. The total forestry resources of Arauco in Chile can supply a mill with a capacity of 1,5 million tons. 70% of the wood that MAPA project will use will be from Arauco. The distance between the plant and forests is 60 km, and 30 km from the shore.

Arauco signed an agreement to buy Masisa's assets in Mexico

Investment

The total investment is US\$ 400 million.

The investment will be around US\$ 185 million.

Total investment is US\$ 2.3 billion.

Total investment is US\$ 245 million.

Capacity

Capacity of 800,000 m³ of which 300,000 m³ will be coated with melamine paper.

The capacity is 550,000 ADt/year.

The output of this industrial complex will be increased by 1 million tons of hardwood per year.

Includes three panel mills, capacity of 519,000 m³ in PB and 220,000 m³ in MDF a year.

Status

Under construction. As of December 2017, it had progress of 70%.

On July 2017, an agreement was reached between the parties to desist the constitutional recourse interposed. The project is expected to be finished in 2019.

Proyecto Mapa is subject to technical and feasibility studies, as well as to Board approval. It would be presented to the Board in mid 2018.

It is estimated that the transaction will be completed during 2018.

Empresas Copec's strategy is to be the leader in the fuel distribution business in the countries where it participates

LIQUID FUELS*

LPG*

LUBRICANTS*

VNG*

* Market share as of 2017

As of 2017, in the fuel distribution business, Ebitda of the companies acquired after 2010 represents a 43% of the total Ebitda

EBITDA 2017

GEOGRAPHIC LOCATION

EBITDA OF FUEL DISTRIBUTION BUSINESS (MMUS\$)

- > In the fuel distribution segment, the Ebitda of the companies before 2010 has remained stable in US\$.
 - It is important to note that Copec’s functional currency is CLP\$ and the average exchange rate rose from 510 CLP\$/US\$ in 2010 to 649 CLP\$/US\$ in 2017
- > On the other hand, companies acquired after 2010 have contributed in an important way to the consolidated Ebitda, mainly due the results of Terpel in Colombia.

Acquisition of **EXXONMOBIL** Downstream Assets in the Andean Region

- > On November 16th 2016, Copec structured a regional agreement with ExxonMobil for the production and distribution of Mobil lubricants in Colombia, Ecuador and Peru, and also the renewal of the agreement between ExxonMobil and Copec for the Chilean market.
- > The agreements also cover the operation and commercialization of fuels for Jorge Chavez International Airport of Lima, Peru, as well as the fuels distribution business that ExxonMobil currently operates in Colombia and Ecuador.
- > Copec transferred the ExxonMobil's business to Terpel, so the company could take advantage of the potential synergies of overhead to operate its assets in Colombia, Peru and Ecuador.
- > On March 15th 2018, Terpel acquired the operations of ExxonMobil in Colombia, Ecuador and Peru.
- > According to the determination of the Colombia antitrust authority, Terpel will have to transfer the assets of ExxonMobil Colombia to a trust controlled by a third party. The trust will transfer the lubricant business to Terpel and will have to sell the fuel distribution business to another company.
- > The price paid was US\$ 714,7 million, of which approximately US\$ 230 million consist of cash held by the companies. Terpel financed this operation trough bank loans.

APPROXIMATED MARKET SHARE 2015

POSITION OF TERPEL BUSINESS

- > The agreement allows Terpel to:
 - Integrate the lubricant operation in a regional level under one brand with worldwide acknowledgment, and...
 - ... consolidate the company as a leader fuel and lubricant player in the Pacific coast, through...
 - ... the acquisition of high quality assets with leadership position and with experienced employees.
- > Furthermore, depending on the antitrust authorities in Colombia, it will be necessary to sell the ExxonMobil's operations and assets acquired in that country to the downstream fuel business.

OPPORTUNITIES FOR TERPEL

COLOMBIA

Terpel would triplicate its lubricants volume in Colombia and would have the opportunity to extend its lubricants offer in that country, and capture new industrial clients with more specific and valuable needs.

PERÚ

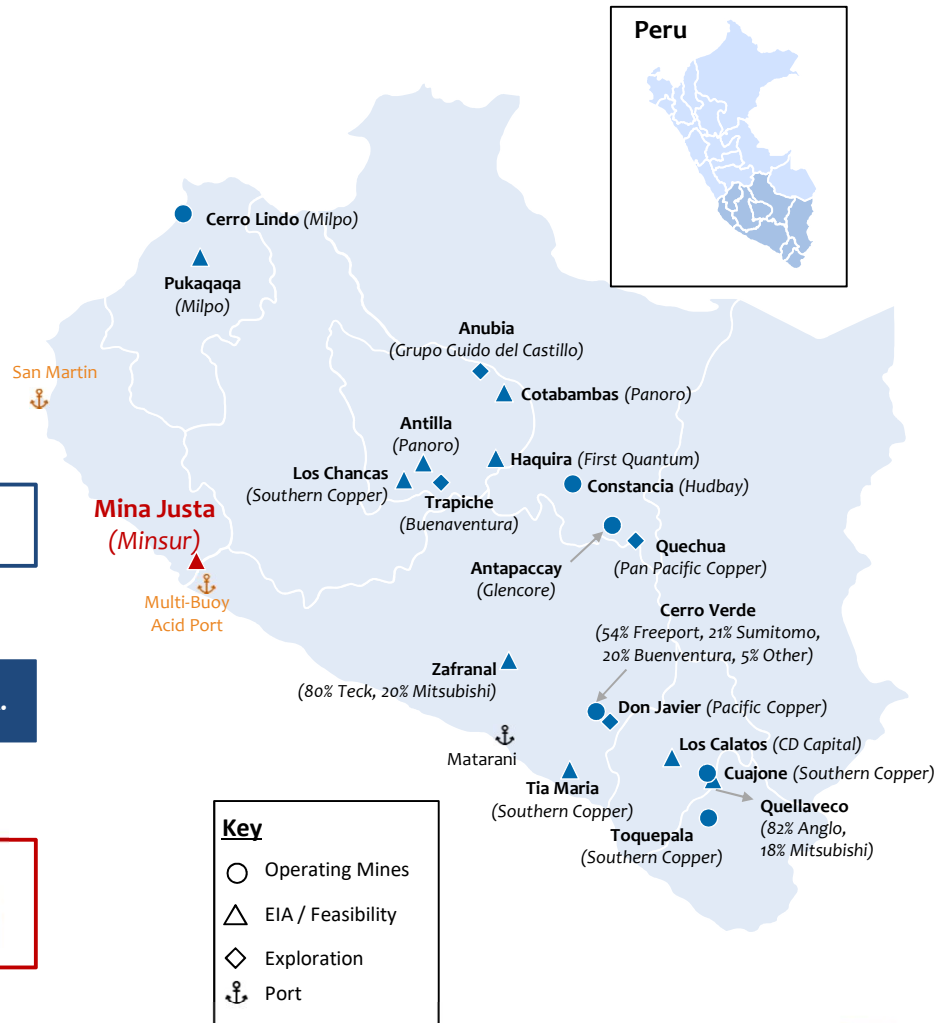

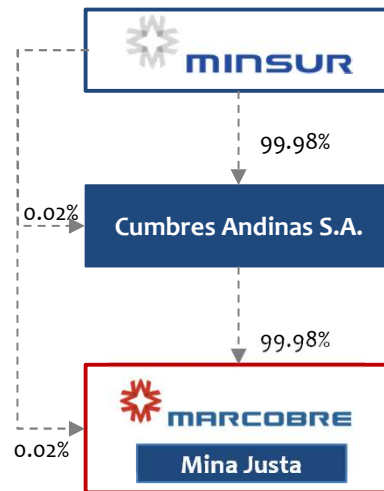

The acquisition would allow Terpel to develop the fuel business in Peru, through aviation as an initial platform.

ECUADOR

The new operation in Ecuador would increase Terpel's market share in the fuel business and also implies a significant potential in lubricants.

- > On April 23rd 2018, Alxar and Empresas Copec signed the agreement to acquire 40% stake in Cumbres Andinas, subsidiary of Minsur.
- > Mina Justa is an open pit copper mining project located in Ica, Peru.
- > World class project:
 - Low cash cost
 - High grade
 - Low development risk
 - Significant exploration potential

ANTARCHILE'S CASH GENERATION AND PROFIT DISTRIBUTION

- > Cash in AntarChile comes mainly from dividends paid out by its subsidiaries.
- > Its dividend policy mandates distribution of 40% of yearly net profit.
- > AntarChile's dividend policy mirrors that of Empresas Copec, thus avoiding accumulation of cash at holding company level.
- > Empresas Copec pays out an interim dividend in December and a definitive dividend in May, whereas AntarChile only pays out a definitive dividend in May.

SG&A EXPENSES – ANTARCHILE (INDIVIDUAL)

- > The increase in accumulated expenses compared to 2016 is explained by extraordinary severance payments incurred in this year's first quarter.

PARENT LEVEL INFORMATION

AntarChile's Asset Portfolio Variation

Up until the sale of Astilleros Arica, AntarChile's investment portfolio had not suffered any variations since 2006.

- > In 2003 Compañía de Petróleos de Chile S.A. (Copec) was restructured so as to move the fuel distribution business into a subsidiary - Copec remaining as parent company-, and change the company name to Empresas Copec.
- > In 2005 AntarChile sold 15.42% of Compañía Sudamericana de Vapores (shipping company).
- > In 2006 AntarChile acquired 9.5% of Colbún (2nd largest power generation company in Chile).
- > In 2015 AntarChile sold its subsidiary Astilleros Arica to Corpesca, a subsidiary of Eperva.

*: Considers 50% of Montes del Plata.

** : Considers 50% of Sonae Arauco

***: This capacity includes the acquisition of Masisa do Brazil

The acquisition of Tafisa positioned Arauco as the second largest producer of panels in the world

- > In late May 2016, the Company purchased 50% of the share capital of Tafisa (an affiliate of Sonae Industria). This transaction marks the commencement of Arauco's production activities in Europe and South Africa, through the creation of the new affiliate Sonae-Arauco.
- > The investment amounts to US\$ 153 million, and includes industrial plants for production of MDF, PB, OSB and sawn timber, located in Spain, Portugal, Germany and South Africa.
- > The total capacity of Sonae-Arauco is 4.2 million m³ per year, which, added to the capacity that is installed to date, positions Arauco as the second largest producer of panels in the world, with a capacity of 9 million of m³ per year.

FUEL Distribution

AntarChile is involved in the fuel distribution industry through seven different subsidiaries: Compañía de Petróleos de Chile (Copec), Organización Terpel, Abastible, Inversiones del Nordeste, Sonacol, Sonamar and Metrogas.

MAPCO PRESENCE IN UNITED STATES

- > On November 14th 2016, COPEC acquired 100% of the share capital and interests in five different companies that operate 348 gas stations in the U.S. and supplies 142 gas stations operated by third parties.
- > The gas stations operate under different brands, chief among them MAPCO. They are located mostly in Tennessee, and also in Alabama, Georgia, Arkansas, Virginia, Kentucky and Mississippi.
- > The purchase price for the companies, free of debt, is US\$ 535 million and a working capital adjustment on the closing date amounting to US\$ 16.3 million.

MAPCO as an Strategic Investment

- > Copec wants to implement their successful business model in Mapco: developing brand loyalty by improving the purchase experience; implementing a commercial strategy based on high throughput - low margin, and develop an industrial channel to complement the retail business.
- > The acquisition allows Copec to enter the most stable, developed and unregulated market in the world, which has more than 140 thousand gas stations and a fragmented supply.
- > Convenience stores in the U.S. service stations have a higher relative value compared with the service stations operated by Copec in other countries, where the fuel selling business is much more relevant.
- > In the U.S. market, 70% of the total sales of a service station came from the convenience store and the rest from fuel.
- > The Chilean and Colombian markets should move towards to the U.S. model, where selling fuel is the booster of other businesses.

ACQUISITION CRITERIA

- Right scale to be the platform for growing in the U.S. market.
- Accessible investment size for Copec.
- Strategic location for the operation.
- The company has a significant number of own service stations.
- Opportunities for improving the operation in both, fuel selling and convenience stores.

OPPORTUNITIES IN THE FUTURE

- Development in the industrial fuel market.
- Improvement in the fuel procurement.
- Acquisition of nearby networks taking full advantage in overhead synergies.
- Unify the brands of the convenience stores and gas stations.

FISHERIES

AntarChile is involved in the fishery industry through two companies, Corpesca and Orizon, which operate Northern and Central-South Chile, respectively. Each of these companies also owns 35% of Golden Omega, a company producing Omega 3 concentrates from fish oil.
